Let’s Talk Prevention

Your No-Cost Preventive Services

Preventive services help you stay healthy. A doctor isn’t someone to see only when you’re sick. Doctors also provide services that help prevent medical problems and help keep you healthy. Staying healthy can help you:

• Live a fuller life
• Save your hard-earned money

Your health plan now offers certain preventive service benefits at no cost to you. This means you don’t have to pay a copay* or coinsurance, even if you haven’t met your deductible. These no-cost benefits are part of the Affordable Care Act (ACA). They include:

• Medicine and supplements to prevent certain health conditions for adults, women and children
• Medicine and products for quitting smoking or chewing tobacco (tobacco cessation)
• Medicine used prior to screenings for certain health conditions in adults
• Vaccines and immunizations to prevent certain illnesses in infants, children and adults
• Contraceptives for women

CVS Caremark® works with your health plan to provide these benefits. The following lists** explain:

• Which medicines, supplements, health-related products or vaccines are covered
• Who they are covered for (such as children up to age six or adults age 65 or older)
• What health condition or illness they help prevent
• Other important information

Tips for Using the Lists

• Take these lists with you each time you or your family has a checkup or yearly exam.
• Your doctor must write a prescription for these preventive services to be covered by your plan, even if they are listed as OTC.

• The dosage form is how the product is supplied. For example, tablet, capsule, liquid, syrup or chewable tablet.
• Generic or brand name is listed if only that product type is covered.
• Treatment recommendations may vary. Please call your doctor or pharmacist if you have questions about your health or medicine**.
• Other rules, limits and exclusions may apply. Please contact your health plan to learn about your coverage**.
• An exceptions process is available for circumstances that fall outside the listed preventive services—such as, for example, a request for coverage of a brand-name product because the listed generic products are not medically appropriate. A process is also available for coverage of preventive services without cost sharing for plan members identifying with a gender that differs from the member’s sex assigned at birth—such as, for example, a request for coverage of contraceptives or primary prevention of breast cancer for transgender members.
